EDOM ANTENEH ALEMU

SOFTWARE ENGINEERING STUDENT | C++ • FULL-STACK DEVELOPMENT • DEVELOPER TOOLS

+251 941 145 494 | edom.anteneh@aastustudent.edu.et | Addis Ababa, Ethiopia

PROFILE

Software Engineering student at AASTU with hands-on project experience in C++, web, and Android development. Interested in code intelligence and developer tooling, with experience building database-backed applications and working in Linux-based development environments.

EDUCATION

B.Sc. Software Engineering | Addis Ababa Science and Technology University (AASTU) | *2024–2029 (expected)*
CGPA: 3.52 • Relevant coursework: Data Structures & Algorithms, Fundamentals of Programming I/II (C++), Database Systems, Data Communication & Networking

TECHNICAL SKILLS

Languages: C++, C, Python, JavaScript, Kotlin, Dart, HTML, CSS
Frameworks & APIs: React, Flutter, Node.js, Express.js, REST APIs, JWT
Databases & Tools: MySQL, MongoDB, Supabase, Git/GitHub, Linux/Unix, Docker, Clang/LLVM

PROJECTS

Aposma - Local-First C++ Code Intelligence CLI | *C++, Clang/LLVM, Python*
Developing a CLI tool for code review, documentation generation, and static analysis, with analysis history and optional local-model review.

TouchGrass - Native Android App | *Kotlin, Google ML Kit*
Built a screen-time control app that requires users to capture and verify real-world nature photos to unlock device access.

Renite - Social Security Web Application | *React, JavaScript, MongoDB, Supabase*
Built the React frontend and explored database-backed state and user-data handling across MongoDB and Supabase.

AASTU Pharmacy Management System | *C++, MySQL*
Developed a console application for pharmacy inventory, transactions, and medication tracking using a MySQL database.

Personal Developer Portfolio | *HTML, CSS, JavaScript*
Designed a responsive portfolio to present software projects, technical skills, and interactive web work.

TRAINING & CERTIFICATIONS

AWS Student Builders Group (SBG), AASTU - Cloud & DevOps Track (Ongoing) | Currently learning cloud networking, subnetting, and IAM fundamentals through hands-on labs.
INSA Summer Camp - Software Development (2026) | Completed one-month intensive training in React, Node.js, Flutter, databases, Docker, and JWT authentication.
GDG on Campus AASTU - Data Structures & Algorithms Track Certificate (Apr 2026)
Udacity - Fundamentals of Programming Nanodegree (Nov 2024)

SOFT SKILLS

Problem-solving, analytical thinking, adaptability, self-directed learning, communication, and teamwork.
